Digestive Support Beyond Fiber*

Fiber is important to everyone's diet, but there are other basic elements that are often overlooked which are vital to a healthy gastrointestinal tract. These elements are prebiotics, probiotics, fiber, and Vitamin D. **Balance D™** combines all of these, creating a synergistic blend that offers optimal digestive support.*

Why are these important?

Prebiotic: Prebiotics are food and fuel for probiotics. Chicory root helps to support an ideal environment where probiotics can thrive.

Probiotic: Rhamnosus, Acidophilus, and Bulgaricus are examples of 'healthy' bacteria your digestive tract needs for proper health and are all infused in **Balance D**. Once they are present in your digestive tract, they are supplemented by the prebiotics found in our formula. When probiotics are broken down, they may support the reduction of the harmful bacteria from your GI tract.

Organic microfiber: Apple, Chicory root, and Maltodextrin are the microfibers that may support and help remove excess waste from the lower intestine.

Vitamin D: **Balance D** contains 300 mcg of Vitamin D per serving, which can help support your body's absorption of calcium, and for supporting bone growth and regeneration.

*Help Create the Ideal Environment
for Probiotics to Thrive*

Balance D's Natural Blend of Ingredients

Balance D properly blends natural ingredients such as prebiotic, probiotics, fiber, and Vitamin D. It's a synergistic blend that offers enhanced digestive support.*

Balance D's formula is rich in prebiotic soluble fiber that feeds the digestive flora in the intestines in the form of **Chicory Root Fiber** and **Apple Fruit Fiber**. It also contains **Maltodextrin**—a more digestible carbohydrate than the common sugar—which provides an effective form of energy supporting the needs of endurance exercises or bodybuilding, and it's also rich in probiotics such as **Lactobacillus rhamnosus**, **Lactobacillus bulgaricus** and **Lactobacillus acidophilus**, providing intensive support to the microflora in the digestive system.
