Protect Your Family and Our Planet. Live a Better, Healthier Life with Sisel.

Did you know that some significant threats to your health could be in your own home, found in the products you use every day?

Over three decades ago Tom Mower, Sr. came to a shocking realization: He found that many of the same harsh chemicals used to manufacture industrial strength cleaners and detergents were also used to produce common household personal care items. These chemicals were reported to pose health risks when they came into contact with the skin. Tom wondered, "Why would personal care products contain chemicals that do so much damage?"

Tom was determined to spread the word and find alternatives to these potentially harmful ingredients. So began his quest to produce an historic explosion of activity—a new awakening—in the health and wellness community, and so began the **Mower Mission**.

Sisel won't use controversial, potentially harmful ingredients in its products. In fact, the mission is to be held to the highest possible standard of ingredient integrity. Sisel always gives you products made from safe, effective, non-toxic ingredients to keep your family safe, healthy, and happy.

Sisel follows the same criteria for every formula created: remove the bad and replace it with the great, so you can use every Sisel product with peace of mind. Sisel products are packaged in BPA and phthalates-free containers.

This level of control is all possible because Sisel manufactures, packages, and ships an array of products in-house. All raw ingredients are stored and mixed under the most rigorous of manufacturing standards. Even the water is purified on the premises, passing through an advanced treatment plant before being utilized in any of Sisel's products. Sisel does all of this so that when you see the Sisel Safe Seal, you'll know it's safe and effective. **Sisel Safe isn't just a slogan—it's a promise.**

Why Sisel?

The health and happiness of your family is your top priority. You care about the food they eat, the air they breathe, and the environment they live in. But did you know that some of the threats to their health could be in your own home, found in the very products that you use every day? The truth is, dozens of products inside your home right now could seriously harm a member of your family if used improperly. Sadly, some of them could cause harm even if used properly.

Sisel realizes the unknown threats your family faces daily and works to eliminate them by manufacturing safe and effective products. We research, formulate, and then produce products that not only save you time and money, but are manufactured without toxic chemicals and are packaged with recyclable materials. This is our Sisel Safe® philosophy, so when you see it stamped on any Sisel product you can rest assured that no dangerous chemicals or toxins were used in its production.
