

Sisel Kaffé™ — Premium Ground Coffee

Superior Tasting Ultra-Rich Ground Health Coffee

At Sisel, we're passionate about producing the best tasting and healthiest coffee available. We pride ourselves on using only the best beans and roasting methods, no matter what the cost. We understand that people who love coffee will know after the first sip that **Sisel Kaffé™ Premium** is the coffee most people will really love and will settle for nothing less.

We start with first-rate ingredients. The award-winning Panamanian Boquete Gesha coffee bean is nourished by a perfected mixture of high altitude, sun exposure and humidity. The coffee also has added Chaga containing B-vitamins, flavonoids, phenols, minerals and enzymes to support the immune and digestive systems. Ganoderma and Chaga are ancient mushrooms used in traditional Chinese medicine to support longevity. Bacopa is known to lend support for the memory, and the leaves and stems of Gotu kola have a long history of supporting respiratory health.

Our manufacturing process is kept entirely in-house. We process the world's best beans using special infrared technology. Only 2% of all the coffee beans in the world are prepared with infrared processors and we're proud to say ours are in that elite group. It results in lower acidity levels and more evenly roasted beans, without the burnt or bitter taste some coffee beans produce.
