

SiselSunDays™ Self Tanning Foam

For a Beautiful Bronzed Look Without the Damaging Effects of UV Rays

Create a natural-looking tan and glowing skin without the dangers of exposing your skin to the sun's harmful UV rays. SiselSunDays™ is a lightweight, quick-drying foam that provides a safe, natural bronzed look that deepens over time. With firming and moisturizing active ingredients, this self-tanning formula will give you that perfect tan you've always wanted, while enhancing skin's firm, youthful appearance, and rejuvenated texture.

KEY INGREDIENTS

As the most efficacious, active self-tanning agent, **Dihydroxyacetone (DHA)** naturally reacts with amino acids found in your skin's epidermal layer to create a darkening of skin cells, creating the look of a beautiful tan, without the damage of the sun. The tanning effect of DHA develops within 24 hours and lasts up to a week.

Erythulose, a natural keto-sugar, works similarly to DHA, reacting with the amino acids on the keratin in the epidermis to create a tanning effect. Combining Erythulose with DHA produces a more even, longer-lasting, less-streaky tan than either ingredient used alone.

An essential nutrient to skin health, **Vitamin E (Tocopherol)** is a powerful antioxidant that is effective at reducing the effects of UV-related skin damage. It nourishes, protects, and soothes your skin.

Found as a natural component in your skin, **Hyaluronic Acid** has restorative abilities to boost skin's moisture content and defend against moisture loss.

Scenedesmus Rubescens Extract is an extract of green freshwater microalgae, rich in a unique composition of amino acids, trace elements and vitamins, that protects against the harmful effects of UV light.

Due to its growth factor-like activity, **Crocus Chrysanthus Bulb Extract** renews skin's resilience and firmness by supporting collagen and elastin production to help reverse the appearance of aging and rejuvenate skin texture.

Chamomilla Recutita (Matricaria) Flower Extract provides skin softening and soothing properties, especially after sun exposure.

This natural, wonder ingredient, **Aloe Barbadosis Leaf Juice**, hydrates, moisturizes, and nourishes your skin. It provides a rich source of antioxidants, skin protection, and a natural, refreshing glow.

A **natural tropical fragrance** brings to mind warm weather and golden sunny days. And a **natural caramel color** complements all skin tones and helps you apply product evenly for a streak-free finish.

DIRECTIONS

Shake well. Pump onto tanning mitt or into hand and rub in an upward, circular motion over exfoliated, dry skin where color is desired. Use sparingly on elbows, wrists, knees, ankles, and feet. Wash palms of hands and between fingers thoroughly with soap and water. Color will darken over time. Be sure to wait six hours before showering. Allow product to fully dry before dressing. For a darker, deeper tan repeat application.

CAUTION

Does not protect against UV rays. Wear sunscreen. Discontinue use if rash or redness develops.

Our SiselSunDays Tanning Mitt ensures you receive a streak-free tan, every time. With a sweet summer design, this super-soft mitt buffs the tanning foam into the skin for flawlessly even coverage. It's machine washable and reusable, for easy maintenance and long-lasting use.

SiselSunDays and the Tanning Mitt are available as the SiselSunDays pack in the summer catalog. Items are not sold separately.
