# SiselTHIN™

Fucoxanthin BHB Advanced  
Weight Management

Sometimes weight management is less about  
what you lose and more about what you gain.

## Weight Management Like Never Before

This powerful weight maintenance product combines several critical elements to improve your chances of success.

**Keto.** Any weight management product should always be taken in tandem with a change in exercise and diet. One of the most popular diets today is the ketogenic diet—a low-carb, high-fat diet. When followed correctly, this diet puts your body into a metabolic state called ketosis. When in ketosis, your body becomes very efficient at burning fat, converting it into ketones in the liver, which drive metabolism, suppress appetite, support muscle function, and provide focus and energy.

**Fucoxanthin and Fucoidan.** Fucoxanthin is a prized carotenoid derived from the same brown seaweed as the sulfated polysaccharide Fucoidan. Research suggests that Fucoxanthin and Fucoidan may promote natural thermogenesis, a process by which the body increases its metabolic rate, requiring utilization of internal stores of energy, such as white adipose tissue or fat.

**BHB.** BHB or Beta-hydroxybutyrate is a naturally occurring salt found in the body during ketosis. Getting into ketosis can be difficult to achieve through diet alone. Exogenous (provided externally) BHBs can provide the critical fuel needed during a keto diet and will help you get into ketosis faster and stay there so you can achieve your weight management goals.

**Ashwagandha.** Chronic stress may lead to elevated cortisol levels that stimulate the appetite, sabotaging a healthy lifestyle and making it difficult to lose unwanted pounds. Ashwagandha is an adaptogen that can help you better manage stress, support a healthy metabolism, improve sleep, and overall well-being.

## Effective, Real, Long-Term Results

## Eat Right to Feel Right

The primary source of our body's fuel comes from three macronutrients found in the foods and beverages we consume: carbohydrates, proteins, and fats. However, the ratio and source of these macronutrients can have a significant impact on our health, weight, focus, and energy output. SiselTHIN makes it much easier to follow a ketogenic diet at a ratio of consumption of 70% healthy fats, 20% protein, and 10% carbs. SiselTHIN can put you into ketosis faster and minimize the side effects that can occur when transitioning from burning carbs to burning fat.

Even if you don't have weight to lose or think you can't follow a ketogenic diet, SiselTHIN can still help you unlock a more fit, focus-driven, and healthier lifestyle.
