Hydrogen Infused Oxygenated Water

A Powerful, Natural Antioxidant

Hydrogen has the potential to permeate into many organs and cells throughout the body, allowing it to go places that many antioxidants may not be able to, including the blood brain barrier.

Diatomic Hydrogen atoms (H₂) are positively (+) charged and seek to bind with free radicals, inhibiting their ability to wreak havoc with normal cellular function.

Cellular Health

In addition to its potentially incredible protective and defensive qualities, hydrogen water may support cellular hydration and enhance cellular efficiency.

Cellular Energy

Hydrogen infused water is a great source of natural, stimulant-free energy by supporting more efficient cellular metabolism in the production of NAD⁺, in order to revitalize the conversion of energy from ATP. Hydrogen water is not an energy source but it may assist your body's natural creation of more energy.

Recovery

Hydrogen water may dramatically help your workouts and recovery by supporting the body's healthy inflammatory response. Hydrogen-infused water is oxygen rich and may assist the body's natural energy production, removal of lactic acid buildup in muscles and other tissues, and help increase reaction time, mental clarity, and memory.
